

# < KC 5000 >

Patent Pending

## Product description

**KC 5000** is a concentrated cleaner for poultry, pig and cattle houses.

The strong cleaning action and its high hydrophobic power allows **KC 5000** to successfully attract and trap all kind of dirt, including spores of parasites such as coccidiosis.

## Properties

**KC 5000** contains compounds with physical cleaning power and wetting agents.

## Direction for use

### In sanitary stop:

- Start with the usual cleaning and disinfecting procedure, using for example an alkaline cleaner followed by disinfection with VIROCID, KICKSTART or CID 20.
- Let dry.
- Spray a 4% solution of **KC 5000** abundantly on the floor until the floor is wet (0,4 to 0,5L/m<sup>2</sup>). Spray as well feeders and drinkers and all surfaces that might come in contact with the birds/pigs or cattle.
- Close the doors and let dry to allow a minimum contact time of 2 hours.

**KC 5000** is compatible with all common cleaning and disinfecting routines on farm.

## Specifications

Appearance:	brown liquid
pH:	2,40 (4%)
Density (20°C):	0,8780-1,0732 kg/l

Store at ambient temperature (>15°C) 24 hours before use.

## Corrosion data and precautions

- Please check the MSDS.
